INTRODUCTION

I am a Software Engineering graduate with hands-on experience in Flutter, React, Node.js, Firebase, and Python-based AI systems. Specialize in building end-to-end applications, from intuitive user interfaces to robust backend systems, APIs, and AI model integration. I'm passionate about developing scalable, real-world solutions that address practical challenges. I am a continuous learner who actively explores new technologies to stay current with industry trends and improve my ability to deliver high-quality and practical software solutions.

EDUCATION

BS Software Engineering (BSSE)

COMSATS University | Lahore Campus | CGPA: 2.97

Feb 2022 – Jan 2026

EXPERIENCE

Flutter Intern

Punjab Information Technology Board (PITB), Lahore

July 2025 - September 2025

- Developed and maintained Flutter application using MVC architecture and state management that made my code 70% cleaner and 20% faster.
- Created responsive, user-friendly mobile interfaces optimized for every Android device using modern UI/UX standards.
- Implemented Firebase authentication and Firestore database integration so user can stay secure and store data.
- Collaborated with a professional dev team of 10+ people using industry workflow and understanding them.

SKILLS

Language: Dart, Python

Mobile: Flutter, MVC, State Management

Web: React.js, Node.js, Express, Tailwind CSS

Databases: MongoDB, Firebase

AI/ML: Computer Vision, Model Training (Colab)

Tools: GitHub, Postman, Vs Code, Android Studio

Soft skills: Problem Solving, Teamwork, Analytical Thinking

PROJECTS

KOKORO DOJO APPLICATION | Flutter, Computer Vision, Fast API | Martial Arts App

January 2025 – November 2025

Final Year Project of martial arts app. It consists of user-authentication, progress tracking, training lectures, user profile, chatbot, and AI model that is trained using different datasets with accuracy of 90+ and it tells the user if they are using the right technique to train. Mainly it's a posture analysis model using Computer Vision.

BOOKS MANGEMENT SYSTEM | MERN Stack | Full Stack Development

July 2024 – July 2024

Books management system that is built in MERN Stack using the platform VS code and tool postman for API verification.

TEK DARAZ SHOPPING WEBSITE | React.js, Node.js, Mongo | MERN Stack

Aug 2024 – Aug 2024

Mobile Teach Shopping website made to help millions of users all over the Pakistan to buy anything from their comfort zone. Implemented an intuitive admin panel for the Teach Shopping website. Streamlined product uploads, order management, and tracking, saving administrators approximately 20 hours per week in manual tasks. Fully SEO optimized with slugging and AI.

CODE SMELL DETECTION | Python, Flask | Tool

November 2024 – December 2024

Code Smell Detection tool build using python to detect the code smells in the whole project or just a file of python code. Using Flask to render frontend.

NUMBER PLATE DETECTION | Python, Django | Image Segmentation

November 2024 – December 2024

Programmed in Python with accuracy of 70% to detect the car number plates. Django used to render frontend and to save the segmented images.

AMERICAN SIGN LANGUAGE PROJECT | Python | AI C Automation

October 2024 – December 2024

ASL improved with the accuracy of 90% to detect the hand sign for the people with disabilities. AI Model trained on Google teachable machines.
