

HAMZA ASIF BAIG

Software Engineer

+923038875757 • hamzaasifbaig190@gmail.com • Lahore, Punjab, Pakistan • [LinkedIn](#) • [Portfolio](#)

SUMMARY

Software Engineering graduate with strong foundations in OOP, data structures, and algorithms, and hands-on experience in Python, full-stack, and mobile development. Proven ability to build scalable, high-performance applications using Flask, FastAPI, React, Node.js, and Flutter, with expertise in SQL/NoSQL databases. Fast learner, problem-solver, and collaborative team player with internship experience, focused on delivering clean, and impactful software solutions.

EXPERIENCE

Flutter App Developer Intern

Jul '25 — Sep '25

Punjab Information Technology Board (PITB)

Lahore, Pakistan

- Crafted and maintained Flutter application using MVC architecture and state management that made my code 70% clean and 20% fast.
- Engineered responsive, user-friendly mobile interfaces optimized for Android devices with modern UI/UX standards.
- Implemented Firebase authentication and Firestore database integration so user can stay secure and store data.
- Collaborated with a professional dev team of 10+ people using industry workflow and understanding them.

Full Stack Developer Intern

Mar '26 — May '26

DevelopersHub Corporation

Lahore, Pakistan (Remote)

- Architected full-stack web applications using React.js and Node.js to deliver scalable and maintainable features.
- Formulated and integrated RESTful APIs and worked with MongoDB for efficient data handling
- Executed debugging, code reviews, and performance optimization while following clean coding practices

EDUCATION

BS in Software Engineering, COMSATS University (GPA: 2.97)

Feb '22 — Jan '26

Lahore, Pakistan

SKILLS

Languages: Dart, Python

Frameworks: Flutter, Flask, FastAPI, React.js, Node.js, Express.js

Databases: MongoDB, Firebase, Microsoft SQL Server

AI/ML: Computer Vision, Model Training (Colab)

Tools: GitHub, Postman, Android Studio, Antigravity, VS Code

Core Skills: OOP, DSA, Problem Solving, Analytical Thinking, Team Collaboration, API Development

PROJECTS

KOKORO DOJO APPLICATION (FYP) | Flutter, FastAPI, Computer Vision

Jan '25 — Nov '25

- Designed and created a full-stack martial arts training app with authentication, progress tracking, lectures, chatbot, and user profiles. Built a Computer Vision-based posture analysis model (90%+ accuracy) to provide real-time technique feedback, simulating a virtual personal trainer.

TEK DARAZ SHOPPING WEBSITE | MERN Stack [Link](#)

Nov '25 — Present

- Developed an e-commerce platform with admin panel for product, order, and user management. Reduced manual workload by ~20 hours/week through automation. Implemented SEO optimization and dynamic routing.

WISDOM PORTAL PK | Next.js [Link](#)

Jun '26 — Present

- Constructed and deployed a full-stack career guidance platform using Next.js and React to help students make informed academic and career decisions. Owned the project end-to-end, from product design through production deployment.

BOOKS MANAGEMENT SYSTEM | MERN Stack

Jul '24 — Jul '24

- Built a full-stack CRUD application using MongoDB, Express.js, React.js, and Node.js. Designed REST APIs and tested endpoints using Postman.

CODE SMELL DETECTION | Python, Flask

Nov '24 — Dec '24

- Created a tool to detect code smells in Python projects or individual files. Developed a lightweight web interface using Flask for analysis and reporting.

NUMBER PLATE DETECTION | Python, Django, Image Segmentation

Jun '24 — Jun '24

- Improved an image segmentation model (70% accuracy) for vehicle number plate detection. Used Django for frontend rendering and storing processed images.

CERTIFICATIONS

Machine Learning Using Python, Simplilearn
